

Environmental Policy

We are committed to minimising any adverse impact on the environment from its activities and will in particular:

- Comply with all applicable environmental legislation and other specific requirements
- Prevent pollution of land, air and water from the clubs premises and its activities
- Identify and manage key risks and ensure that arrangements are in place to respond to foreseeable environmental incidents and emergencies
- Review the actual and potential environmental impacts of all the clubs activities, including those affecting the local community
- Minimise energy consumption by improving energy efficiency in line with its needs and implementing the use of renewable energy sources wherever possible
- Promote waste minimisation, re-use and recycling of waste and monitoring waste transfer arrangements to ensure safe disposal
- Develop environment friendly travel plans, which address commuting and travel, aiming to contribute to a reduction in traffic congestion and pollution
- Encourage suppliers of goods and services to adopt best environmental practices and procure goods from sustainable sources wherever possible
- Demonstrate our responsibility as a good neighbour by actively

supporting environmental initiatives in the local community

- Strive for continuous progressive improvement in environmental performance through the setting of specific objectives and targets and the development of key performance indicators
